Software developer

I'm a software developer; I'm passionate about technology to deliver innovative solutions, and I'm a highly skilled developer who can work in groups effectively. Whether working on front-end development, back-end infrastructure, or full-stack projects.

WORK EXPERIENCE

Experts Turnkey Solutions—*Ramallah, Batn El-Hawa December 2024–May 2025*

Software Developer

Worked as a software developer specializing in low-code development using Appian.

- Designed and implemented a fully integrated Deposits Management System using Appian.
- Contributed to the development of a real-world Employee Facilitation System for a major bank.
- Ensured high code quality through unit testing, peer code reviews, and adherence to Appian best practices.

Injaz Organization —*Nablus, Rafidia January 2023–August 2023*

Operations Supervisor

- Created detailed UI scripts based on the expected design flow.
- Developed front-end components and implemented responsive layouts using React.js.
- Designed future work scenarios and interface prototypes using Figma.

EDUCATION

An-Najah University—*Nablus, Rafidia*

Bachelor's Degree—Computer Engineering, July 2024.
